

AMERICAN SOCIETY FOR GRAVITATIONAL AND SPACE BIOLOGY SPONSORSHIP OPPORTUNITIES

2010

AN IDEAL OPPORTUNITY FOR FAMILIARIZING MEMBERS WITH YOUR PRODUCTS AND SERVICES

ASGSB 2010 will bring together scientists and engineers engaged in the advancement of gravitational and space biology. It will be an open forum that provides an opportunity to present research results and share data and information. To be held at the Gaylord Resort in the National Harbor, Washington, D.C. November 4-7th, 2010, it is an international conference open to interested participants from all organizations including academic, government, not-for-profit and industry. Advocacy, networking and building partnerships are the advantages of becoming an ASGSB corporate sponsor.

CORPORATE SPONSORSHIP LEVELS

Platinum (\$5,000)

What sponsorship opportunity could provide more support or visibility? Have your company's name visible at the Friday evening reception or be the exclusive sponsor of Saturday's keynote speaker, Dr. Scott Parazynski. This level includes signage at the registration desk acknowledging your company's participation. Also included are two complimentary meeting registrations and two annual membership, one free exhibit space, and listing as a platinum member in the conference program, ASGSB newsletter, and the ASGSB website.

Gold (\$3,000)

This level includes one complimentary registration, one annual membership, one free exhibit space, and listing as a gold member in the conference program, ASGSB newsletter, and the ASGSB website.

Silver (\$1,500)

This level includes one complimentary registration, one annual membership and listing as a silver member in the conference program, ASGSB newsletter, and the ASGSB website.

Rose (\$1,000)

This level truly benefits the students in the society. ASGSB supports selected travel stipend awards for undergraduate and graduate students who would like to present a poster at the annual conference. In addition, cash awards are presented to winners of the student poster competition in several categories. This level will help support the student travel stipends, and sponsor one of the cash awards. Your company may present the award at the banquet on Saturday night. Your company's name will be acknowledged in the conference program, ASGSB newsletter and the ASGSB website.

So what is Gravitational and Space Biology?

The biological effects of gravity have been acknowledged since Galileo's time, but only since the 1970s has gravitational and space biology begun to attract attention. With the birth of the space age, the opportunity for experimentation over the full spectrum of gravity finally became a reality, and a new environment and research tool became available. Our goal is to understand biological phenomena and expand scientific knowledge on earth and in space, and mentor the next generation of scientists and engineers.
